Photographs can be very powerful in evoking emotions. It is every photographer’s dream to transmit a compelling message to the viewer. A series of photos can be strung together to tell a story, sell an idea or market a product.

Digital photography allows you to explore and experiment with visual elements such as light, colour, form, texture, flow and dynamism to improve the photograph composition and even steer the viewer’s perceptions.

Digital photography training provides students with a knowledge of camera settings, positioning of camera and subject, lenses and lighting equipment to capture good images. It is important to acquire technical skills on image manipulation using software tools because effective editing will accentuate the desired message from the image.

SIM University (UniSIM) photography courses offer students the necessary space to exercise their vivid imagination, push their creative boundaries and help strengthen their visualisation skills.

UniSIM is proud to organise this photography exhibition titled “Line and Lines”, featuring photographic works from our first batch of SkillsFuture students taking MTD105e Digital Photography Technology, which is one of the SkillsFuture subsidised courses.

We wish all Singaporeans a fulfilling lifelong learning journey with SkillsFuture where every individual’s passion can be realised.

**Photography Talk by Mr Steven Yee**
19 March 2016, 2pm
You are welcomed to join us at the Photography Talk by Mr Steven Yee, Associate Faculty, UniSIM; and Founder, PhotoVivo Singapore International Photography Award (PIPA).

Government Subsidy for MOE-approved SkillsFuture* skills-based modular courses
If you are a Singapore Citizen (SC), and satisfy the eligibility criteria, your course fees will be subsidised at 55%; in other words, you will only need to pay 45% of the course fees.

Eligibility Criteria
You are eligible for fee subsidy if you:
• have not previously received a government subsidy for the same course; and
• are at least 21 years of age; and
• have either 2 years of full-time work experience, or have fully discharged full-time NS liability, or are currently employed on a full-time basis; and
• are enrolled as a Credit student

SkillsFuture Mid-Career Enhanced Subsidy
If you are a SC aged 40 and above, taking MOE-approved SkillsFuture modular courses, you will enjoy an additional subsidy of 60% off the remaining fee payable.

SkillsFuture Credit**
SkillsFuture Credit aims to encourage individuals to take ownership of their skills development and lifelong learning. Starting January 2016, if you are 25 years and above, you will receive an opening credit of S$500. You can use this credit to pay for the course fees of any SkillsFuture modular course approved by MOE or Singapore Workforce Development Agency (WDA) (as listed in the SkillsFuture credit directory).

Fee per course with Subsidy and SkillFuture Credit#
• 25-39 years old: $132.37 (Course Fee for 2016 + Application Fee)
• 40 years old and above: $64.20 (Application Fee only with course fee paid from SkillsFuture subsidies and credit)

*Please refer to UniSIM’s website http://www.unisim.edu.sg/CET/Pages/SkillsFuture-Courses.aspx for the list of SkillsFuture approved modular courses.

**Please refer to WDA’s SkillsFuture Credit directory website for approved courses.
